

New Stabilisers

Tear and Wash

72cm wide £1.99 metre or 5mt roll £9.50

This is an easy-tear embroidery stabilizer that dissolves with repeated washings in warm or cool water. It combines the best of both worlds providing stability for the embroidered design but with no bulky leftover to affect the feel of the garment. Simply hoop one layer in with the garment and after sewing, tear away the excess stabilizer. It is ideal for light- to medium-stitch counts on light- to medium-weight woven fabrics. It's also a good choice for terry cloth and towels. It is also ideal for heirloom or decorative machine stitching.

Please note this stabilizer is NOT suitable for freestanding lace projects.

Washaway Adhesive

102cm wide £8.95 metre

Washaway adhesive stabilizer perfect for when you need to hoop a project but can't because it does not fit a hoop area and you need to remove all traces when finished with the embroidery. Just hoop the stabilizer, score and remove the release sheet, stick the item to the stabilizer and embroider. When done wash away the residue.

Soluble Fabric Extra Wide *(replacement for Solusheet)*

153cm wide £9.95 metre

Soft and sheer, stronger than dissolvable films, no fibre residue and fully dissolvable in warm water. Ideal for stand alone embroidery designs and other projects that require 100% complete backing removal.

Over The Back Fusing

75cm wide £2.95 metre or 2mt pack £5.50

Fuse over the back of your embroidery design to give a smooth surface next to the skin.

New Stabiliser Sample Pack £7.75
